

Engaging Diversity

The Engaging Diversity Development Partnership is part funded by the ESF Equal Programme. It aims to find new ways of embracing diversity within organisations. It will design, develop, and deploy online Awareness Raising Modules, and will support a vibrant e-Community Network of professionals.

The Engaging Diversity Development Partnership has 20 partners, including Local authorities, NHS Trusts, other public bodies, businesses, charities and NGOs. It is also working with other Partnerships in Portugal, Poland and Slovakia. It is researching and developing new ways of using the Internet to share ideas, and create solutions that raise the awareness of diversity among people at work.

The partnership will create innovative bilingual e-learning modules covering:

- Disabilities
- Religious Beliefs
- Age
- Gender
- Sexual Orientation
- The Welsh Language

The partnership will create a network of e-Communities to share ideas and develop solutions.
